Purpose & Vision

Mission:

To equip underserved individuals with the tools to align their goals, values, and daily habits fusing personal development, financial literacy, and behavior change into one culturally relevant digital experience.

Core Objectives:

- Develop a visually appealing, intuitive MVP using no-code tools.
- Demonstrate PurposeMap™, habit building, journaling, and progress tracking.
- Showcase the unique blend of financial literacy, cultural relevance, and behavior change.

Technical Architecture Overview

Component	Tool	Description
Frontend	Glide or Adalo	No-code mobile app development platform for rapid deployment and intuitive user interface
Backend/Database	Airtable	Manages user data including values, goals, reflections, badges, subscriptions
Automation	Zapier	Connects user actions (e.g., habit completion) to triggers like email/SMS and badge assignment
Forms/Quizzes	Tally / Typeform	For onboarding, check-ins, journaling prompts, and the values quiz
Subscription & Access Control	Stripe + Memberstack	Manages payment tiers (Free, Growth, Elevate) and content access

User Journey & Feature Workflows

1. User Onboarding & Values Quiz

- **UI Instructions:** Design a welcome screen with "Start Quiz" CTA. Use soft branding (teal/gold), empowering copy.
- **Tech Steps:** Embed a Tally or Typeform form. Fields: Name, Email, 3-value selection from list.
- **Backend:** Send results to Airtable (via Zapier or native form sync).
- **App Behavior:** Store values in "PurposeMap Values" field in Users table.

2. PurposeMap Generation

- **UI Instructions:** After quiz, show screen with 3 highlighted values and sample goals.
- **Tech Steps:** Pull PurposeMap Values from Airtable and map to pre-defined goal templates.
- **UI Feature:** Display 3 goal buttons or tiles ("Save \$100", "Journal 3x/week", etc.)

3. Goal & Habit Setup

- **UI Instructions:** When a goal is selected, show 2–3 micro-task options.
- **Tech Steps:** Create habit entries in Airtable with User ID, Goal ID, Task Name, Status: Incomplete.
- **Automation:** Use Zapier to track time-based nudges (e.g., Daily reminder email)

4. Micro-Wins & Progress Tracking

- **UI Instructions:** Show checklist or streak interface for habits.
- **Tech Steps:** Mark completion via Glide toggle button → update Airtable field to "Complete"
- **Logic:** Use progress bar that shows % of tasks completed (Glide math column)
- **Badge Trigger:** If tasks completed = 3 → assign "Starter Streak" badge (Airtable + Zapier logic)

5. Reflection & Journaling

- **UI Instructions:** Simple journal screen with question prompt and text box.
- **Tech Steps:** Embed Tally/Typeform or native Glide form. Save entries in "Reflections" table with a timestamp.
- **Bonus:** Add mood scale (1–5). Reflect it back on the dashboard as an average emotional score.

6. Dashboard & Profile Overview

- **UI Instructions:** Progress dashboard includes badges, completed goals, savings chart, mood trend.
- **Tech Steps:** Create a user-specific view using Glide's filter: "User is signed-in user"
- **Visuals:** Use charts and icons for motivation.

7. Upgrade to Paid Plan

- **UI Instructions:** Compare 3 tiers with clear benefit visuals. CTA: "Upgrade Now"
- **Tech Steps:** Link to Stripe checkout (Growth \$19 / Elevate \$49).
- **Zapier:** On payment success, update "Tier" field in Users table → unlock premium screens
- **Memberstack Alternative:** Use Memberstack to manage gated content per plan.

8. Premium Content Access

- **UI Instructions:** Growth/Elevate users see "Downloads", "Group Coaching", and extra tools
- **Tech Steps:** Use Glide visibility condition: "Tier is Growth or Elevate"
- **Files:** Upload planners, calendars, guides to Glide file column

9. Badges & Rewards System

- **UI Instructions:** Display earned badges on separate "Achievements" screen
- **Logic:** Badge awarded based on:
 - First goal set
 - 3 habits completed
 - 7-day streak
- **Tech Steps:** Use Airtable formulas or Glide logic to auto-tag when condition is met
- **Automation:** Optional Zapier email on badge unlock

10. Admin Dashboard (Optional)

- **UI Instructions:** Not for users, but for admin to see metrics
 - **Data:** Total users per tier, badge unlock rate, goal completion %, reflection count
 - **Tech Steps:** Use Airtable summary blocks or Glide admin-only tab
-

Deliverables Summary

Item	Description
Interactive Mobile Prototype	Glide/Adalo app showcasing complete user flow
Pitch-Ready Visual Deck	Slides for demoing product & business model
Walkthrough Video	Optional screen-recorded user journey for presentation
Admin Airtable	Preloaded with test user data & workflows

Full Tech Implementation Plan

PHASE 1: SYSTEM SETUP

1. Set Up Airtable Base

1. Go to [Airtable](#) → Create a new base → Name it **PurposeMint**
 2. Add 6 tables:
 - Users
 - Goals
 - Habits
 - Reflections
 - Badges
 - Subscriptions
 3. Import the sample CSVs provided earlier into each table
-

2. Set Up Glide App

1. Visit [Glide Apps](#) → New App → Start from “Airtable”
 2. Connect the PurposeMint Airtable base
 3. Enable **User Profiles**:
 - Go to Glide → Settings → Users → Enable
 - Set “Users” table as profile source
-

PHASE 2: USER JOURNEY BUILD

3. Onboarding Quiz (Values)

1. Create a screen: **Start Quiz**
 2. Embed a **Tally/Typeform** link using a “Webview” or “Link” component
 3. Map results to Airtable “PurposeMap Values” using Zapier or Tally’s integration
-

4. PurposeMap™ View

1. Create screen: **Your PurposeMap**
 2. Pull “PurposeMap Values” from Users table
 3. Below that, display 3 CTA buttons → Connect to pre-set Goals in Goals table
-

5. Goal + Habit Setup

1. When a goal is selected → Use a button → Create new row in **Habits**
 - User ID
 - Goal ID
 - Task Name (e.g. Deposit \$10)

- Status: Incomplete
 - 2. In Airtable, create a formula: If 3 habits are marked Complete → assign badge
-

PHASE 3: TRACKING, REWARDS, & JOURNALING

6. Micro-Wins & Progress Tracking

1. Create screen: **My Habits**
 2. Add a checklist component linked to Habits table → Filter: signed-in user
 3. Use a “Math” column in Glide to calculate % completion
 4. Use a “Progress Bar” based on the percentage
-

7. Journaling & Mood Tracking

1. Create screen: **Daily Reflection**
 2. Use a Glide Form → Add fields:
 - Mood (scale 1–5 dropdown)
 - Text input for journal
 3. Submit to **Reflections** table
 4. Display entries in “Journal History” tab (optional)
-

8. Dashboard Overview

1. Create screen: **Dashboard**
 2. Pull from:
 - Reflections: Count of entries
 - Habits: Completed this week
 - Users: PurposeMap values
 - Badges: Which earned
 3. Add visuals: Pie chart, bar graph, or stat card components
-

PHASE 4: SUBSCRIPTIONS + ACCESS CONTROL

9. Stripe Payment + Zapier

1. Create **Upgrade Plan** screen
 2. Add 3 pricing cards:
 - Free: \$0
 - Growth: \$19
 - Elevate: \$49
 3. Each card links to **Stripe checkout link**
 4. After successful payment:
 - Zapier updates “Tier” field in **Users** table
 - Tier now used to unlock premium screens in Glide
-

10. Tiered Content Display

1. On every tab (Downloads, Coaching, Premium Journal):
 - Set **Visibility Rule**:
 - Only show if `User.Tier` is `Growth` or `Elevate`
 2. Add “Locked” message for Free users
-

11. Badge Logic (Gamified)

1. Create Badge table rows like:
 - “First Goal Set”
 - “Completed 3 Habits”
 - “7-Day Streak”
 2. In Airtable or Glide:
 - Add logic column (e.g., IF statement)
 - Use visibility to show badges based on logic
 3. Use Zapier → Send congratulatory email when badge earned
-

12. Admin Dashboard

1. Create a hidden tab: **Admin View**
 2. Display:
 - Total users
 - Users by tier
 - Reflection entries this month
 - Average mood
 3. Set **visibility condition**: only allow specific admin email
-

Testing Steps

1. Create 2 fake users (Free + Growth) and simulate the flow
2. Use the "Preview as user" feature in Glide
3. Test habit toggles, form submissions, dashboard updates
4. Upgrade a test user via Stripe test link → Check access updates
