

PurposeMint Data Requirements – FinTech Sandbox Residency

The following are the key datasets that PurposeMint needs to build and scale its platform. These datasets will be used across both the No-Code MVP and the React Native (mobile) versions, and only the essential ones have been listed below.

1. Required Datasets

Dataset	Purpose / Why Needed	Key Fields	Partner(s)	Used In
Open-Banking (Accounts & Transactions)	Enable goal tracking, spending insights, and automated micro-saves based on real-time account balances and transactions.	accountId, institutionId, accountType, currentBalance, availableBalance, txnId, date, amount, merchant, MCC, category, isPending	Plaid / Yodlee	Both (No-Code via Zapier/Make, RN via API/SDK)
Payroll / Income / Employment	Provide paycheck-linked saving rules, detect income cycles, and enable employer-based challenges or matches.	employerId, employerName, paySchedule, lastPayDate, gross, net, ytdGross, employmentStatus	Argyle	Both (No-Code via webhooks, RN via SDK/API)
Credit Attributes (Lightweight)	Build a financial wellness score combining cash-flow, income, and credit summary data (non-lending).	scoreBand, tradelineCount, utilizationPct, derogatoryFlag	Equifax	Both (Backend integration)
Macro & Reference Data	Provide contextual education such as inflation trends, deposit rate comparisons, and market indicators for savings guidance.	CPI, depositRate, unemploymentRate, inflationRate	Nasdaq Data Link / S&P / FactSet	Both (No-Code scheduled API pulls, RN backend cron jobs)
News & Financial Education Feeds	Support the 'Money Moments' feature and push timely financial education or motivational content.	headline, summary, category, source, attribution	Associated Press / MT Newswires / Dow Jones	Both (No-Code RSS → Airtable, RN backend feed → mobile UI)

2. Summary

PurposeMint will kick off its FinTech Sandbox Residency by integrating with **Plaid (or Yodlee)** for open banking and **Argyle** for payroll connectivity. Later, it will bring in **Equifax, Nasdaq Data Link, and AP/Dow Jones** as secondary partners to enhance data enrichment and financial education. Together, these integrations will power PurposeMint's complete user experience—helping users track, plan, and improve their personal financial wellness.
